#### Introduction

The purpose of this document is to describe the data available for download from the Provider Data Catalog (PDC) for Nursing Homes including rehabilitation facilities. It contains three main sections, corresponding to three programs that publicly report data for nursing homes. The first section describes most of the nursing home data files that are on PDC and that contain the data underlying most of the information displayed on Care Compare on Medicare.gov for Nursing Homes. This is referred to as the nursing home primary data and is exclusive of the other two sections. The second section describes other data also displayed on Medicare.gov specific to the Skilled Nursing Facility Quality Reporting Program (SNF QRP), and the third section describes data specific to the Skilled Nursing Facility Value-based Purchasing (SNF VBP) Program.

Table 1 in this document gives a high-level description of each of the PDC data tables (downloadable csv files). Subsequent tables give more detailed information about the data elements included in each of these files as well as other information needed to successfully use and interpret the data.

#### **Note Regarding Leading Zeros in Excel**

Due to a limitation in how Microsoft Excel removes leading zeros when opening comma separated value (CSV) files, instructions are provided on the Provider Data Catalog to assist you. For the most up to date information, please reference the Frequently Asked Questions and the question titled, "How do I download files in Excel?" The Frequently Asked Questions can be found here: https://data.cms.gov/provider-data/about#download-files-in-excel.

Month Revisions Effective (YYYYMM)	PDC Table Title(s)	Overview of Changes
202004	SNF QRP	Footnote codes have been consolidated between the QRP QMs and the non-QRP QMs. This affects the SNF QRP downloadable files only, which are documented later in this file. However, the updated text for the footnotes is included here on the Footnote Codes table and corresponds with the footnotes used on the Nursing Home Compare website.
202001	MDS Quality Measures	The measure code for the SNF Pressure ulcer measure has changed from 002 to 476. It now has the same measure period as the other MDS QMs; however, it is still not calculated for individual quarters.
202001	State US Averages	Because the measure code for the SNF Pressure ulcer measure has changed from 002 to 476, QM002 has been dropped and QM476 has been added. Note also change in column order for the QM state averages.
201911	Health Deficiencies; Fire Safety Deficiencies	Adding a column CATEGORY in Download Version and "Category of Deficiency" in Display version that indicates the category of the Health Deficiency (as organized on the NHC website and as summarized in SurveySummary file). Inserted between Deficiency Prefix (DEFPREF) and Deficiency Tag Number (TAG).
201911	Provider Information	Changing header of ABUSE column to ABUSE_ICON in Download version and Abuse Icon on Display.
201910	Provider Information	Adding ABUSE column between the SFF Status column and OldSurvey columns. This column identifies providers that have been cited for resident abuse or neglect.
201910	MDS Quality Measures	The rows corresponding to the pain measures (402 and 424) have been dropped. The QRP pressure ulcer measure (002) has been added. Note that unlike the other MDS quality measures the QRP pressure ulcer measure is not calculated for individual quarters. This is indicated with a new footnote code (19 - see Footnote Codes table). None of these changes add/remove any columns from these downloadable data files.
201910	State US Averages	The columns for the state and US averages for the pain QMs (QM402 and QM424) have been dropped. The QRP pressure ulcer measure (QM002) has been added.
201907	Provider Information	Special Focus Facility (SFF) column replaced by Special Focus Status (SFFStatus). This column identifies current Special Focus facilities as well as providers that are candidates for the Special Focus program.
201904	All	To be more consistent with NHC website, all footnote fields will now include codes instead of text. The "Footnote Codes" table, which has been added to this data dictionary file provides the meaning of all footnote codes.

Month Revisions Effective (YYYYMM)	PDC Table Title(s)	Overview of Changes
201904	MDS Quality Measures	Time period now shown with a single column (measure period). Changes in measure codes for several QMs: (long-stay pressure ulcers, flu vaccination measures); note that SNF QRP QMs are not included in this table.
201904	Medicare Claims Quality Measures	Adding LS ED visit measure (552); and LS hospitalization now a 5-star measure; note that SNF QRP QMs are not included in this table.
201904	Health Deficiencies; Survey Summary	Dropping column that indicates if health deficiency is from survey on or after 11/28/2017 (hlthsrvy_post20171128).
201904	State US Averages	Changing the term "Expected" with reference to the value used in the calculation of adjusted staffing to "Case-Mix"; no change in the calculation, and note that only the US Average is included in the adjusted staffing calculations; Table name changed to State US Averages; measure codes associated with many QMs changed; dropped column PREV_HTH_AVG (Previous Survey Number of Health Deficiencies).
201904	Provider Information	Substantial changes. Columns added: 8 columns related to cycle 3 of health inspection (after cycle_2_total_score); 4 columns added for LS and SS QM ratings and associated footnotes (between quality_rating_fn and staffing_rating); Columns dropped: Health Survey Date under new process; Number of Health Deficiencies on Survey Under New Process, Severity of Most Severe Deficiency cited under new process, Scope of Broadest Scope Deficiency Under New Process, Date of Previous Standard Health Inspection, Number of Deficiencies on Previous Standard Health Inspection. Additionally, the term "Expected" with reference to the case-mix factor used in calculation of adjusted staffing is being renamed as "CaseMix". This change affects several columns.
201810	Medicare Claims Quality Measures	No changes to layout (columns); Addition of the Long-Stay Hospitalization Measure to this table (measure code is 551).
201810	State Averages	Adding LS Hospitalization measure (QM551).
201808	State Averages	Adding expected RN and total nurse staffing.
201806	State Averages	Adding resident census based on MDS (column is RESTOT in downloadable).
201805	State Averages	No changes to layout; however, the state and US averages for count of FireSafety Deficiencies are no longer NA. Affected column names: C1_FS_DEFS_CNT, C2_FS_DEFS_CNT, C3_FS_DEFS_CNT.
201804	State Averages	Changing all instances of CNA to Nurse Aide - this affects the column header (display version) for AIDHRD.

Month Revisions Effective (YYYYMM)	PDC Table Title(s)	Overview of Changes
201804	Provider Information	Changing all instances of CNA to Nurse Aide - this affects the column headers (display version) for the 3 columns related to Aide staffing (the column headers in Access and downloadable do not change: AIDHRD, exp_aide, adj_aide); also changing the column header (display version) for resident census (column is RESTOT in downloadable).
201802	Provider Information	Substantial changes: New columns added (after adjusted total nurse staffing): Health Survey Date under new process; Number of Health Deficiencies on Survey Under New Process, Severity of Most Severe Deficiency cited under new process, Scope of Broadest Scope Deficiency Under New Process, Date of Previous Standard Health Inspection, Number of Deficiencies on Previous Standard Health Inspection. Columns dropped: all columns related to Cycle 3 (7 columns); definitions of some other columns have changed; note that "cycles" in this table refer to the cycles used in the Health Inspection Rating (i.e., rating cycles).
201802	Health Deficiencies	Substantial changes: Deficiencies table split into two tables - HealthDeficiencies and FireSafetyDeficiencies; note that cycles in this table refer to display cycles -results from health inspections on or after 11/28/2017 are not used in the health inspection rating.
201802	Fire Safety Deficiencies	Substantial changes: Deficiencies table split into two tables - HealthDeficiencies and FireSafetyDeficiencies.
201802	Survey Summary	Substantial changes: new column added (after cycle): Health Inspection after 11/28/2017; seven (7) columns dropped: "Scope and Severity of most severe health deficiency" through "Count of Substandard QOC deficiencies on Health Survey"; categories of Health Deficiencies and Fire (life safety) deficiencies have changed so all columns containing counts of deficiencies within each category have changed.
201802	State Averages	Substantial changes: averages for the following columns will be reported as NA (Not Available): Cycle 1, 2 and 3 number of Health Deficiencies and Cycle 1, 2 and 3 number of Fire (life safety) deficiencies; new column added: Previous Survey Number of Health Deficiencies.
201612	Survey Summary; State Averages	Starting in December 2016 and until further notice, because of an issue with the life safety deficiencies, all columns that include information related to life safety surveys (other than the survey dates) or deficiencies cited on these surveys (K tags) are being set to NULL.
201607	MDS Quality Measures	Rows for Q4 variables have been added.
201606	Provider Information	For the reported staffing measures (AIDHRD, VOCHRD, RNHRD, TOTLICHRD, TOTHRD, & PTHRD), the flag value (Staffing_flag or PT_Staffing_Flag) to indicate suppressed data has been changed to "Data Not Available" to be consistent with what is displayed on NHC.

## Section II – Skilled Nursing Facility Quality Reporting Program (SNF QRP) Introduction to the SNF QRP Program

The Centers for Medicare & Medicaid Services (CMS) Care Compare tool on Medicare.gov provides a single user-friendly interface that consumers can use to understand information about nursing homes, doctors, long-term care hospitals, and other health care services instead of searching through multiple tools. The data displayed on Medicare.gov enables patients and caregivers to make informed decisions about healthcare based on cost, quality of care, volume of services, and other data. Information about the quality measures on Medicare.gov are presented similarly and clearly across all provider types and care settings. Consumers can select multiple facilities and compare their performance on various quality metrics. To access the Care Compare tool, please visit <a href="https://www.medicare.gov/care-compare">https://www.medicare.gov/care-compare</a>.

This section provides information about the Skilled Nursing Facility Quality Reporting Program (SNF QRP) data on Medicare.gov. Medicare.gov provides data on over 15,000 SNFs that participate in the SNF QRP program. More information about the SNF QRP measures displayed on the compare tool on Medicare.gov can be found by visiting the SNF QRP Technical Information page at:

https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/NursingHomeQualityInits/Skilled-Nursing-Facility-Quality-Reporting-Program/SNF-Quality-Reporting-Program-Measures-and-Technical-Information.

Quality measure information about SNFs is typically updated or refreshed quarterly in January, April, July, and October; however, the refresh schedule is subject to change and not all measure data will be updated during each quarterly release. See Table 25: Anticipated SNF Public Reporting Refreshes and Data Collection Timeframes for the full list of SNF measures contained in the downloadable data found on the Provider Data Catalog website, along with information about reporting cycles for each measure.

Links to download the data from the zipped comma-separated value (CSV) flat file formats can be found on the Provider Data Catalog website. When archived data snapshots become available, they will also be provided on the Provider Data Catalog. To access the Provider Data Catalog, please visit: <a href="https://data.cms.gov/provider-data/">https://data.cms.gov/provider-data/</a>.

The compare tool on Medicare.gov and the Provider Data Catalog are publicly accessible websites. As works of the U.S. government, the data on these websites are in the public domain and permission is not required to reuse them. An attribution to the Centers for Medicare & Medicaid Services as the source is appreciated. However, data should not be construed as an endorsement by the U.S. Department of Health and Human Services of any health care provider's products or services. Conveying a false impression of government approval, endorsement or authorization of products or services is forbidden. See 42 U.S.C.1320b-10.

The first column displays the plain-language measure name used on Medicare.gov, the second column displays the full technical measure name, the third column displays the data collection periods and reporting frequency, and the last columns contain the timeframe for each quarterly website refresh. Periods of performance are subject to change.

Variable Name (Column Header)	Description	Variable Type				
Improvement Score	A calculation of how much a SNF has improved from the baseline period (FY 2019) to the performance period (FY 2023). Scores range from 0 to 90, with higher scores indicating better performance.	Text

Performance Score	The higher of a SNF's achievement score and improvement score. Scores range from 0 to 100, with higher scores indicating better performance. CMS uses this score to calculate incentive payment multipliers for the SNF VBP Program.	Numeric

Incentive Payment Multiplier	A multiplier assigned to a SNF based on its performance in the SNF VBP Program. When payments are made to a SNF's Medicare fee-for-service (FFS) Part A claims in FY 2025, CMS multiplies the SNF's adjusted federal per diem rate by this multiplier.	Numeric
